Linking a profile to your account

We will now show you how to link an already existing competitor profile to your account. This is needed to be able to sign up for competitions on Strength Results or used by the organizers when adding you manually to a competition.

Navigate to My Account->Settings. Scroll down to the section called My Profile. Click on the button “Link a competitor profile to this account”. This opens up a popup where you can either search or create a profile.

Try searching on either first name, last name, nickname or birth date to try and find an existing profile. Best results are usually found by using the last name. If your profile is found, select it and then press “Select this profile and close”
